Section 23a of the State Construction Act of 1972, Act No. 230 of the Public Acts of 1972, being Section 125.1523a of the Michigan Compiled Laws, prohibits a person from conspiring to circumvent the licensing requirements of this state relating to persons who are to perform work on a residential building or residential structure. Violators of Section 123a are subject to civil fines.

**HOMEOWNERS AFFIDAVIT:** I hereby certify the work described on this permit application shall be installed by me, by myself in my own home, in which I am living or about to occupy. All work shall be installed in accordance with the State Code and shall not be enclosed, covered up or put into operation until it has been inspected and approved by the inspector. I will cooperate with the inspector and assume the responsibility to arrange for the necessary inspections.

# ELECTRICAL RESIDENTIAL APPLICATION

Permits are good for six (6) MONTHS from date of issue providing you have had an inspection once in a six (6) month period.

Ground fault interrupters required on all residential outside receptacles, including garages and all residential bathroom receptacles, and kitchen receptacles.

Firestopping is required where holes are drilled through any plate and cold air return.

Service and rough inspections could be covered under one inspection on new built homes if ready. Additional inspection fee due if not inspected at same time. Addition and remodeling permits require two (2) inspections (Rough & Final).

The electrical inspector will call Detroit Edison to release the service hook-up.

All fixtures hung, lamps and plate covers installed for final inspection.

Pre-manufactured home installation requires four (4) wire installation, from disconnect to service panel.

Pre-manufactured home connectors used for two or three wire circuits need inspection before siding is installed.

Pre-manufactured home – **One-Time Use Plugs, Self Contained Power Connectors** – If these connectors are used in any installation of a pre-manufactured dwelling unit, they shall be installed and inspected to manufactures specifications. If the installation is in a concealed area of the unit, an inspection will be required before cover.

Interconnecting smoke detectors wired 110 volt on all floors and in each bedroom or sleeping area.

Swimming pool installation required in conduit where the wire enters and exits the ground. Ground fault interrupter required. Bonding with continuous #8 bare solid copper wire around pool, tied to pool on four (4) sides, ladder, and diving board for all pools. On ground pools require one (1) inspection (Final). In ground pools require two (2) inspections (Underground & Final).

**Air Conditioning Units ONLY**-- Inspection *must* be scheduled within two (2) weeks of the installation.

Generator manufacture's specification booklet must be on site for inspector to approve installation.

IT IS UNDERSTOOD THAT THIS IS STRICTLY A GUIDE. IT IS HIGHLY RECOMMENDED THAT THE SPECIFIC INSPECTOR BE CONTACTED TO ANSWER ANY QUESTIONS.

*Adopted 04/30/08 Effective 07/01/08*

*Revised 2/1/2012*
